### EXTRACURRICULAR

- 2023–2024

*Vice President, ISTUN Computer & Software Engineering Community*

*Actively involved in the community, organizing events and fostering collaboration among students.*

I am a 2nd-grade software engineering student with a passion for working on game and website development projects, particularly in back-end development. I have a basic understanding of server-side processes and some relevant experience in this area. I am earnestly committed to gaining practical insights, actively contributing to projects, and pushing the boundaries of my potential.

### EXPERIENCES IN FIELD

- Development of Cubevelo Game | Project Leader, Lead Developer  
2022

Key responsibilities:

- Organized and coordinated team members, assigning tasks, and ensuring timely delivery of milestones.
- Leveraged the features and capabilities of C# to implement game mechanics, player controls, and user interfaces, ensuring a smooth and interactive gaming experience.

- Grin's Journey (Published Game) | Sole Developer, Independent Developer  
2023

Key responsibilities:

- Utilized Unity game engine and C# programming language to develop the entire game from scratch, including character movement, enemy behavior, level design, and scoring systems.
- Published and managed the release of Grin's Journey on the Google Play Store, including creating promotional materials, optimizing app store listings, and managing updates.

- Development of mehmetakifvardar.com | Full Stack Developer  
2023

Key responsibilities:

- Developed the front-end of the personal website using Bootstrap 5, ensuring a responsive and visually appealing design that enhances user experience across various devices and screen sizes.
- Designed and developed an admin panel using ASP.NET Core MVC, providing an intuitive interface for content management and website administration.

- Development of Restaurant Website Project | Project Leader, Front-End Developer  
2023

Key responsibilities:

- Led a team of front-end developers for a restaurant website project.
- Developed responsive and interactive front-end components using Bootstrap 5..

### TOP SKILLS

- Hard Skills

- Advanced level C#
- Intermediate level C,C++
- Intermediate level Bootstrap 5
- Beginner level ASP.NET Core MVC
- OOP principles

- Soft Skills

- Team Leadership
- Problem Solving
- Communication
- Collaboration
- Adaptability
